SUMMARY

I'm a Senior React Native engineer from Montevideo, Uruguay, with 7+ years building cross-platform mobile apps with React Native and React for startups and enterprise clients in the US and Latin America.

A few things I've built. As the first and only engineer at Volca.ai, I built the MVP (React Native app and Node.js backend) in three months for a conference demo that helped raise a \$5.5M seed round. I built BuildFeed end to end as its only engineer, and I'm the only React Native engineer on uCTRL's MVP.

I've spent years on distributed teams, and I care about app performance, reliable releases through CI/CD, and interfaces that feel obvious to use.

EXPERIENCE

uCTRL Senior Mobile Engineer · 2026–Present

AI-native personal health app. I'm the only React Native engineer and I build the whole iOS app.

React Native, HealthKit, OCR

Road Scholar Project lead · 2025–Present

Social app for educational travelers. I took over the project, fixed its most serious bugs and led it through launch.

BuildFeed Creator and sole engineer · 2026

A news app for AI developers that I designed and built end to end.

Society of Thoracic Surgeons React Native developer · 2025–2026

Surgical risk calculators for cardiothoracic surgeons; I built new calculators and fixed existing ones.

React Native

Walo Tech lead · 2025–2026

Booking and payments app for a pilates studio; I led it and built push, OTA updates and payments.

React Native, Expo, MercadoPago

Volca.ai First and only engineer · 2024–2025

First engineer at a seed-stage startup. I built the MVP, app and backend, in three months for a conference demo that helped raise a \$5.5M seed round.

React Native, Expo, React, Node.js, PostgreSQL, Twilio, LangChain

Centerline Portal Web and mobile developer · 2023–2025

Expense, reporting and driver-compliance platform for a transportation staffing company, on web and Expo.

Expo

Stafftrack Senior React Native developer · 2023–2025

Workforce app for TrueBlue's staffing operations; I led new features and performance work with Expo.

React Native, Expo

TicketTwist Team lead, full-stack developer · 2024

Ticket resale platform; I led the team from development to launch, on mobile and backend.

React Native, Expo, Node.js

Cooper's Hawk React Native developer · 2022–2023

Member app for a restaurant and winery chain with 40+ locations, rated 4.9 out of 5 from 63K ratings on the App Store.

React Native

Arly Families and Teams Senior front-end developer · 2022

Two multilingual communication apps for youth programs, one for families and one for staff.

AAOS Membership Senior front-end developer · 2021–2022

Membership app for the American Academy of Orthopaedic Surgeons, with 38,000+ members.

React Native

JShip Front-end React developer · 2021

Online shipping platform with discounted rates from UPS, FedEx and USPS.

React

Pet Cloud React Native developer · 2021

Pet health app for Figo Pet Insurance; I led the real-time vet chat built on SignalR.

React Native, SignalR

Lithium Knowledge Base Full-stack developer · 2020

Notion-style internal knowledge base app that I led, built with Expo and Apollo GraphQL.

React Native, Expo, Apollo GraphQL

Rivelin React developer · 2020

Web app for businesses to keep a categorized budget and see their financial data in one place.

React

AyP Soft React developer · 2019

Responsive company website for an IT consultancy, built with React and Next.js.

React, Next.js

EDUCATION

Bachelor's degree in Software Engineering, ORT Uruguay, 2022

LANGUAGES

English, Spanish

TECHNOLOGIES

Apollo GraphQL, Expo, HealthKit, LangChain, MercadoPago, Next.js, Node.js, OCR, PostgreSQL, React, React Native, SignalR, Twilio
